

Teachers and parents: We provide these materials to give your children, listening and, if they are old enough, reading practice. The higher the child's listening and reading level, the easier it is for them to achieve English fluency. Help your students by explaining the scenes in each video.

The eventual aim is for the child to reach Upper Intermediate, Advanced or Proficiency Level before entering university. Understanding the spoken and written word is the foundation that helps students to achieve this aim, as this video explains [The Surprising Truth About English Learning Nobody Tells You - YouTube](#).

Note: These materials can also be used by Adult Beginners.

Children and Beginners: Enjoy your English! Watch the videos a few times, play the games and write the date.

Join our [Telegram group](#) to learn of other courses at higher levels. If your children enjoy the course please subscribe and like on Youtube, share with friends and even buy us a coffee. Thank you.
